§ 13

The annual general meeting resolved, with qualified majority, in accordance with the board's complete proposal on acquisition of treasury shares and transfer of treasury shares as follows:

a) Acquisition of shares in accordance with the employee stock option plan for 2012

The annual general meeting granted a mandate to the board, for a term ending at the close of the next annual general meeting, to resolve to acquire shares in the company on one or more occasions, as following:

1. Acquisition shall be limited to a maximum of 4,550,000 Class A shares.
2. The shares may only be acquired on NASDAQ OMX Stockholm.
3. Acquisition of shares through trading on NASDAQ OMX Stockholm may be transacted only at a price per share within the registered trading range in effect from time to time.

The acquisition is made to reduce the economic risk when the share value increased during the validity period of the employee options and to secure delivery of shares according to the employee option and matching share agreements entered into, as well as to cover alternative incentive solutions and cash settlements and to cover, primarily social charges.

b) Acquisition of shares reflecting synthetic shares to directors of the board

The annual general meeting granted a mandate to the board, for a term ending at the close of the next annual general meeting, to acquire shares in the company on one or more occasions as follows.

1. Acquisition shall be limited to a maximum of 70,000 Class A shares.
2. The shares may only be acquired on NASDAQ OMX Stockholm.
3. Acquisition of shares through trading on NASDAQ OMX Stockholm may be transacted only at a price per share within the registered trading range in effect from time to time.

The acquisition is made to hedge the costs of the company's obligation, including social charges, towards such a director of the board who has opted to receive 50 % of the board fee in synthetic shares.

c) Transfer of shares in accordance with the employee stock option plan for 2012

The annual general meeting decided to transfer shares in the company by reason of the company's employee stock option plan for 2012 as follows. A maximum of 3,500,000 Class A shares may be transferred. The right to acquire shares shall accrue to individuals covered by the company's 2012 employee stock option plan, with the right for each participant to obtain the maximum number of shares permitted under the terms and conditions of the company's employee stock option plan. Transfer of shares shall take place on the terms and conditions stated in the company's employee stock option plan, which means among other thing that the specifications therein with regard to prices and the period during which participants may exercise their rights to acquire shares, shall also apply to the transfer. Participants shall remit payment for shares, within the time and in the manner specified in the terms and conditions for the employee stock option plan 2012. With regard to the number of shares that may be subject to transfer under the company's employee stock option, customary terms shall apply for adjustment due to bonus issues, splits, preferential issues and similar measures in accordance with the terms and conditions of the employee stock option plan 2012.

The reason for deviation from the shareholders right to preemption and the base for the price calculation at transfer is that the transfer of shares is part of an integrated process related to the mandate regarding hedging of synthetic shares as part of the board fee.

d) Sale of shares in connection with directors of the board's synthetic shares

The annual general meeting granted a mandate to the board, for a term ending at the close of the next annual general meeting, to sell shares in the company at on one or more occasions of a maximum of 15,000 Class A shares, to cover costs equivalent to previously issued synthetic shares to a previous director of the board, and to cover costs, primarily social insurance charge.

The shares proposed to be sold were acquired for the specific purpose each respective year in accordance with mandate from that year's annual general meeting. The shares may only be sold on NASDAQ OMX Stockholm and only at a price per share within the registered trading range in effect from time to time.

The reason for deviation from the shareholders right to preemption and the base for the price calculation at sale is that the sale of shares is part of an integrated process related to the mandate regarding hedging of synthetic shares as part of the board fee.

e) Sale of shares in accordance with the employee stock option plan for 2007, 2008 and 2009

The annual general meeting voted to grant a mandate to the board for a term ending at the close of the next annual general meeting to sell treasury shares in the company on one or more occasions to cover costs, including social insurance charges, cash settlements, or performance of alternative incentive solutions in countries where allotment of employee stock options is unsuitable, in accordance with the obligations in the 2007, 2008 and 2009 performance based employee stock option plans as follows: A maximum of 1,200,000 Class B shares and held by the company may be sold for the purpose of the 2007 stock option plan and a maximum of 4,700,000 Class A shares for the purpose of 2008 and 2009 stock option plans.
