Agenda

1. Performance review
2. Sustainable profitable growth
3. Business areas
4. Summary
Performance review
January – September in brief

- Strong order growth
  - Particularly strong growth for vacuum and mining
  - Double-digit order growth in almost all regions

- All business areas growing with solid profitability

- Strong operating cash flow, in spite of growth

- The split project progressing according to plan

Near-term outlook

- The overall demand for the Group is expected to remain at current high level
Orders received – local currency

ROCE 20%
Innovation is key

Main Technologies

Air, power and flow

Portable compressors, pumps, generators, light towers and handheld tooling

Industry Focused Solutions

Portable offshore equipment, boosters, steam and nitrogen generation, oil-free compressors and air treatment
Innovative products to be launched in the coming months

- New portable efficient electric compressors
- Containerized efficient Twin-engine generator for Europe
- Battery technology in light towers
- Extended high-flow pump range
- Full range of compact utility compressors
- Start to roll out stage 5 ready generators
- Monitoring control
  - As standard on select new units
  - Retrofitting field units

Innovative products to be launched in the coming months
