13

Products and Applications

Example Slope Stabilisation

- Road and Railway Construction
 - Slope stabilisation
- ROC D7 Radio Remote Control
 - Possibility to see work point out of danger zone
 - Low center of gravity
 - High ground clearance
 - Exceptionnally good climbing capabilities

16

Efficiency and Asset Management

- More standardized products and less loyal aftermarket base than for example underground equipment
- Efficiency gains and asset control are important aspects of our business
- Two examples:
 - Lead time reduction
 - Reduction of assembly stock and WIP

Capital Markets Day
September 21, 2004

www.atlascopco-group.com

17

Efficiency and Asset Management

- Assembly stocks (blue) and work in progress (red) is reduced to half.

- Assembly time for L Rigs reduced from 28 to 17 days

Summary and Outlook

- Global market leader in surface drilling equipment
- Current Good demand is expected to continue into 2005
- Plans in place
 - Further grow geographically
 - Launch new products incl. Aftermarket products
 - Further increase our efficiencies
- Increased design & development resources with Atlas Copco Drilling Solutions. Truly global manufacturing base
- ... the Hole story is bound to continue
