Atlas Copco Group - Currency Effects

Policy

- Transaction exposure: Match the currency flows as much as possible.
Remaining exposure:
 - Surplus: USD, AUD, CAD, HKD, ZAR, GBP etc
 - Deficit: SEK, EUR

The Group does not hedge this transaction exposure on a regular basis. However, the Financial Risk Management Committee decides from time to time to hedge specific currency exposures.

The result of such Group hedges is reported as a corporate item, while the Business Area results always show an "un-hedged" situation.

- Translation exposure: match assets and liabilities in the same currencies as much as possible. A mismatch is left unhedged.
