Multi-year variable remuneration (LTIPs)

Since 2006 the annual general meeting has resolved each year upon a performance-based employee stock option plan for key employees based on a proposal from the Board for the respective year. The size and the limits of the interval of the performance criteria, have been reviewed annually and established by the Board and are compatible with the goals in the long-term business plan of the Group.

Participation in the plan is based on position, qualification and individual performance and the nominated employees are divided into four different categories with different maximum amount of allotment of stock options.

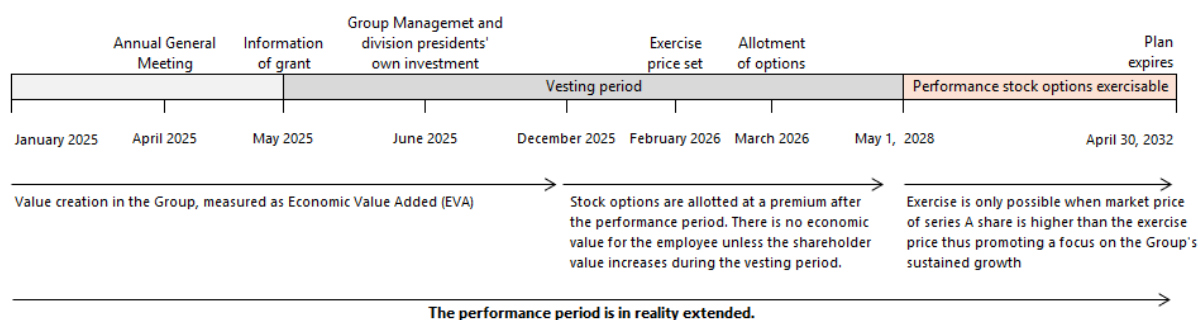

As a prerequisite for the full participation in the plan, Group Management and division presidents have to invest 10% of their base salary (20% for expatriates with net salary), before tax, in Atlas Copco AB series A shares. A lower investment will reduce the number of performance stock options proportionally. Further, up to and including LTIP 2024, Group Management and division presidents who chose to invest in Atlas Copco AB series A shares were, in addition to the proportional participation in the plan, allotted matching options corresponding to the number of shares acquired under the respective plan.

Consequently, and subject to continued employment, there is a prerequisite for Group Management and division presidents that decide to participate in the offered LTIP to always hold invested shares under three consecutive plans.
