

July 19, 2023

Atlas Copco Second-quarter report 2023

Solid orders, record revenues and operating profit

The comparison figures presented in this report refer to previous year unless otherwise stated.

Second quarter

- Orders received increased 6% to MSEK 43 471 (41 010), organic decline of 5%
- Revenues increased 31% to MSEK 43 364 (33 111), organic growth of 18%
- Operating profit reached MSEK 9 189 (7 279), corresponding to a margin of 21.2% (22.0)
 - Adjusted operating profit, excluding items affecting comparability, was MSEK 9 488 (7 042), corresponding to a margin of 21.9% (21.3)
- Profit before tax amounted to MSEK 9 026 (7 305)
- Basic earnings per share were SEK 1.42 (1.17)
- Operating cash flow at MSEK 2 864 (3 064)
- Return on capital employed was 30% (28)

Return on capital employed, %	30	28				

¹⁾ Operating profit excluding amortization of intangibles related to acquisitions.

Near-term demand outlook

Atlas Copco expects that the customer activity level will weaken somewhat compared to the current high level.

Previous near-term demand outlook (published April 27, 2023):

Atlas Copco expects that the underlying customer activity level will remain at the current level.

Summary of half-year results

Orders received in the first six months of 2023 increased by 12% to MSEK 91 178 (81 389), corresponding to an organic growth of 0%. Acquisitions contributed with 6% and currency had a positive effect of 6%. Revenues increased by 32% to MSEK 83 225 (63 197), corresponding to an 18% organic increase.

Operating profit increased by 28% to MSEK 17 888 (14 028). The operating margin was 21.5% (22.2). Adjusted for items affecting comparability, the margin was 21.8%

(21.5). There was a positive impact of changes in exchange rates for the first half-year of MSEK 1 010.

Profit before tax was MSEK 17 681 (13 976), corresponding to a margin of 21.2% (22.1). Profit for the period totaled MSEK 13 469 (10 891). Basic and diluted earnings per share were SEK 2.76 (2.24) and 2.76 (2.23) respectively.

Operating cash flow before acquisitions, divestments and dividends totaled MSEK 7 812 (5 464).

Review of the second quarter

Market development

The demand for the Atlas Copco Group's products and services remained strong even though the order intake did not reach the very high level of the previous quarter.

Year-on-year, solid order growth was achieved for gas and process compressors, while order volumes for industrial compressors remained basically unchanged. The demand for vacuum equipment was lower than the previous year, and the order intake decreased markedly, especially for semiconductor applications. Order volumes for industrial assembly and vision solutions increased, driven by increased demand from the automotive industry. Order volumes for Power equipment such as portable compressors and generators decreased, affected by weaker demand from equipment rental companies. The specialty rental business achieved solid order growth in the quarter, and order volumes for service increased in all business areas.

In total, the order intake increased in Europe and Asia but decreased in North America.

Orders, revenues, and operating profit margin

Revenues, profits and returns

Revenues increased 31% to record MSEK 43 364 (33 111), corresponding to an organic growth of 18%. Currency had a positive effect of 7%, and acquisitions added 6%.

The operating profit increased 26% to record MSEK 9 189 (7 279) and includes a change in provision for share related long-term incentive programs, reported in Common Group Items of MSEK -299 (+237).

Adjusted operating profit increased 35% to MSEK 9 488 (7 042), corresponding to a margin of 21.9% (21.3). The main explanation for the higher margin was increased organic revenues.

Net financial items amounted to MSEK -163 (26) whereof interest net at MSEK -156 (-29). The increased interest cost was a result of more debt and higher interest rates. Other financial items, including financial exchange differences were MSEK -7 (55). Profit before tax amounted to MSEK 9 026 (7 305), corresponding to a margin of 20.8% (22.1). Corporate income tax amounted to MSEK -2 085 (-1 627), corresponding to an effective tax rate of 23.1% (22.3). The higher effective tax rate compared to the previous year was partly due to a geographical mix effect.

Profit for the period was MSEK 6 941 (5 678). Basic and diluted earnings per share were SEK 1.42 (1.17) and SEK 1.42 (1.16), respectively.

The return on capital employed during the last 12 months was 30% (28). Return on equity was 33% (31). The Group uses a weighted average cost of capital (WACC) of 8.0% as an investment and overall performance benchmark.

Operating cash flow and investments

Operating cash surplus increased to MSEK 11 100 (8 645).

Net financial items and taxes paid amounted to MSEK -3 652 (-2 039). Working capital increased by MSEK 3 158 (increase of 2 301), mainly due to increased trade receivables as a result of higher revenues. Net investments in rental equipment were MSEK -372 (-172). Net investments in property, plant, and equipment, were MSEK -934 (-760).

Operating cash flow (important internal KPI, but not an IFRS measurement, and hence defined on page 13) reached MSEK 2 864 (3 064).

Net indebtedness

The Group's net indebtedness amounted to MSEK 31 998 (20 437), of which MSEK 2 492 (1 977) was attributable to post-employment benefits. The Group's interest-bearing liabilities have an average maturity of 4.8 years. The net debt/EBITDA ratio was 0.8 (0.6) and the net debt/equity ratio was 37% (31).

Acquisition and divestment of own shares

During the quarter, 4 594 319 series A shares, net, were sold for a net value of MSEK 697. These transactions are in accordance with mandates granted by the Annual General Meeting and relate to the Group's long-term incentive programs. See page 17.

Employees

On June 30, 2023, the number of employees was 51 363 (45 130). The number of consultants/external workforce was 3 459 (4 155). For comparable units, the total workforce increased by 2 353 from June 30, 2022.

Industrial compressors

The demand for industrial compressors remained solid, even if the organic order intake was essentially unchanged compared to the previous year, both for large and smaller-sized compressors. Sequentially, however, the order intake did not reach the high level of the previous quarter.

Geographically, and compared to the previous year, order volumes increased in Europe, remained essentially unchanged in Asia, but decreased in North America.

Gas and process compressors

Solid order growth was achieved for gas and process compressors although the order intake did not match the exceptional levels in the first quarter.

Geographically, and compared to the previous year, order volumes increased in Asia and Africa/Middle East but decreased in all other regions.

Compressor service

The demand for service remained strong, and solid order growth was achieved in all regions.

Innovation

The business area introduced a new hydrogen compressor for mobility applications, the H2Y. The new product targets various types of hydrogen filling stations. Thanks to the hydraulic booster technology, the new product offers consistent gas quality and the ability to have frequent start and stop reliability, especially suited for “FastFill” filling stations.

Acquisitions

The business area completed three acquisitions in the quarter:

C.P. Service SRL, an Italy-based compressor distributor and service provider with 13 employees and revenues of MSEK 60.

Maziak Compressor Services Ltd. a UK distributor of air compressors, nitrogen generators, process cooling equipment and related services with 40 employees and revenues of MSEK 87.

Asven S.R.L. an Argentinian compressed air distributor with 10 employees.

Revenues and profitability

Revenues increased 30% to record MSEK 18 600 (14 291), corresponding to an organic increase of 21%.

The operating profit also reached a record at MSEK 4 472 (3 266), corresponding to a margin of 24.0% (22.9). The higher margin was mainly due to increased organic revenues. Currency and dilution from acquisitions affected the margin negatively. Return on capital employed (last 12 months) was 83% (86).

Orders, revenues and operating profit margin

*Volume, price and mix.

Semiconductor and flat panel display equipment

The demand for equipment to the semiconductor and flat panel industry weakened significantly, and order volumes decreased compared to the previous year. The order intake compared to the previous quarter was essentially flat.

Geographically and compared to the previous year, order volumes decreased in all regions.

Industrial and scientific vacuum equipment

Order volumes for industrial and scientific vacuum equipment decreased compared to the previous year and sequentially. The negative year-on-year order development was due to lower demand for equipment to both industrial and scientific vacuum applications.

Geographically, order volumes increased in North America, were unchanged in Europe, but decreased in Asia.

Vacuum service

The service business continued to grow with increased order intake from semiconductor and industrial customers. Solid order growth was achieved in all major regions.

Innovation

A new range of advanced pressure gauges was launched, the Leybold PENNINGVAC PTR 90/225 R. The new products offer a high vacuum measuring range, compact design, and flexibility to fit customers' particular vacuum systems, especially customer segments such as glass coating, medical, and research and development.

Acquisitions

The business area completed three acquisitions in the quarter:

James E. Watson & Co., a US-based distributor of vacuum equipment and service solutions with 7 employees.

Shandong Bozhong Vacuum Technology Co., Ltd, a Chinese manufacturer of liquid ring pumps and systems, with 116 employees and revenues of about MSEK 120.

Trillium US Inc., a US-based vacuum service provider with 140 employees and revenues of MSEK 270.

Revenues and profitability

Revenues increased 17% to 10 911 (9 335), corresponding to an organic increase of 5%. The operating profit increased 18% to record MSEK 2 504 (2 123), corresponding to a margin of 22.9% (22.7). The margin was supported by increased organic revenues, but negatively affected by dilution from acquisitions. Currency had no effect on the operating margin. Return on capital employed (last 12 months) was 23% (25).

Orders, revenues and operating profit margin

2023	7 918	7 280

*Volume, price and mix.

Automotive industry

The order intake for industrial assembly and vision solutions for the automotive industry remained strong, and solid order growth was achieved compared to the previous year. Order volumes also grew sequentially.

Geographically, and compared to the previous year, order volumes increased markedly in all major regions, especially in Europe.

General industry

The demand for industrial assembly and vision solutions for the general industry was mixed and the order intake remained unchanged both compared to the previous year, as well as sequentially. Some customer segments, such as aerospace and off-highway, had a positive order development, while others, such as glass and energy, did not reach the previous year's level.

Geographically, orders were slightly up in North America, increased in Europe, and remained essentially unchanged in Asia.

Service

Order volumes for the service remained strong, and solid order growth was achieved in all major regions.

Innovation

The business area introduced a new assembly solution for multi-spindle applications, the Multi. The new products, placed on a tightening station, offer remote control management, reduce the need for floor space, and can control up to 40 tools.

Revenues and profitability

Revenues increased 35% to record MSEK 7 280 (5 405), corresponding to an organic increase of 28%.

The operating profit increased 47% to record MSEK 1 585 (1 077), corresponding to a margin of 21.8% (19.9). The main explanation for the higher margin was increased revenue volumes. Currency had a negative effect on the margin. Return on capital employed (last 12 months) was 20% (17).

Organic*, %	-12	+26
Total, %	+30	+61
2023	6 483	6 828

*Volume, price and mix.

Equipment

The demand for power equipment such as portable compressors and generators decreased compared to the previous year, partly due to equipment rental companies' lower investment levels. However, due to contributions from recent acquisitions the overall order intake increased. Sequentially, the order volumes did not reach the very high level of the first quarter, partly due to a normal seasonal pattern.

Geographically and compared to the previous quarter, the order intake increased in Asia and Africa/Middle East but decreased in all other regions.

Specialty rental

The specialty rental business continued to develop positively, and solid order growth was achieved compared to the previous quarter and sequentially.

Year-on-year, order volumes increased in all regions, particularly in Asia and North America.

Service

Order volumes for service increased with solid growth in most regions.

Innovation

The business area introduced a new diaphragm metering pump, the LEWA LCD Ecosmart Plus, targeting food and beverage, chemicals, and wastewater applications. The new product offers high flow at low pressure and meters a wide variety of fluids with high precision while maintaining high efficiency.

Acquisitions

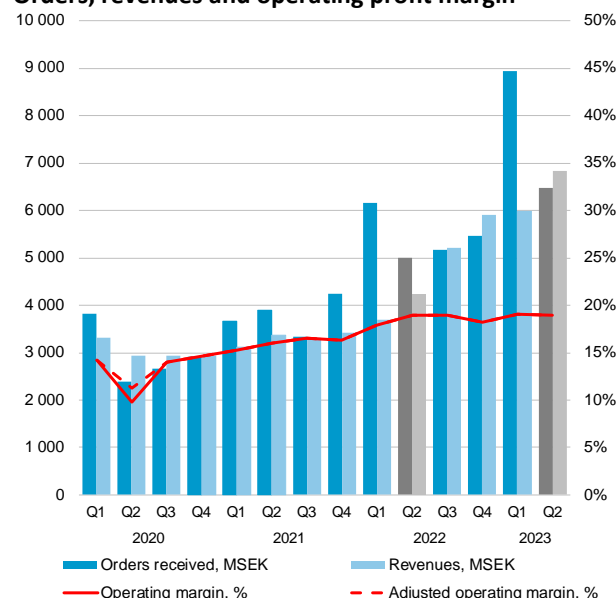

In the quarter, National Pump & Energy was acquired, an Australia-based company providing dewatering, environmental services, and water treatment solutions. The company has 420 employees and revenues of MSEK 1 400.

Revenues and profitability

Revenues increased 61% to record MSEK 6 828 (4 247), corresponding to an organic increase of 26%. Acquisitions contributed with 27%.

The operating profit increased 60% to record MSEK 1 294 (807), corresponding to a margin of 19.0% (19.0). The margin was supported by increased organic revenues. An unfavorable sales mix had a negative effect on the margin. Acquisitions only had a marginal negative effect on the operating margin. Return on capital employed (last 12 months) was 23% (29).

Orders, revenues and operating profit margin

Accounting principles

The consolidated accounts of the Atlas Copco Group are prepared in accordance with International Financial Reporting Standards (IFRS), as adopted by the EU. The description of the accounting principles and definitions applied in this report are found in the Annual Report 2022. The interim report is prepared in accordance with IAS 34 Interim Financial Reporting. Non-IFRS measures are also presented in the report since they are considered to be important supplemental measures of the company's performance. For further information about these measures and how they have been calculated, please visit:

<https://www.atlascopcogroup.com/en/investor-relations/key-figures>

Risks, risk management and factors of uncertainty

Atlas Copco's global and diversified business is active within many customer segments and results in a variety of risks and opportunities geographically and operationally. Thus, the ability to identify, analyze and manage risks is crucial for effective governance and control of the business. The aim is to meet the Group's goals with a high awareness of risks and well-managed risk taking. Atlas Copco sees the benefits of an efficient risk management both from risk reduction and business opportunity perspectives, which can lead to good business growth.

Risks in Atlas Copco are identified in a 360-degree spectrum, meaning that both internal, and external exposures are assessed including today's circumstances and future changes. The Group's risk management approach follows the decentralized structure of Atlas Copco. Risks are analyzed and addressed in an integrated way. Local companies are responsible for their own risk management, which is monitored and followed up regularly at for example local business board meetings. Group functions responsible for legal, insurance, human resources, compliance, sustainability, treasury, tax, controlling and accounting provide policies, guidelines and instructions regarding risk management.

Risk areas include compliance risks, external exposure risks, including pandemics, operational risks and strategic risks. These risk areas can impact the business negatively both in the long and short term, but often also create business opportunities if managed well. Examples of risks and how they are handled is described below.

Market risks

The demand for Atlas Copco's equipment and services is affected by changes in the customers' investment and production levels. A general economic downturn, geopolitical tensions, pandemics, changes in trade agreements, trade sanctions, a widespread financial crisis and other macroeconomic disturbances may, directly or indirectly, affect the Group negatively both in terms of revenues and profitability. However, the Group's sales are well diversified with customers in many industries and countries around the world, which mitigates the risk.

Financial risks

Atlas Copco is subject to currency risks, funding risks, interest rate risks, tax risks, and other financial risks. In line with the overall goals with respect to growth, return on capital, and protecting

creditors, Atlas Copco has adopted a policy to control the financial risks to which the Group is exposed. A financial risk management committee meets regularly to manage and follow up financial risks, in line with the policy.

Production risks

A large part of the components used in production are sourced from sub-suppliers. The availability is dependent on the sub-suppliers and if they have interruptions or lack capacity, this may adversely affect production. To minimize these risks, Atlas Copco has established a global network of sub-suppliers, which means that in most cases there are more than one sub-supplier that can provide a certain component. Atlas Copco is also directly and indirectly exposed to raw material prices. Cost increases for raw materials and components often coincide with strong end-customer demand and can partly be compensated for by increased sales prices.

Acquisitions

Atlas Copco has the ambition to grow all its business areas, primarily through organic growth, complemented by selected acquisitions. The integration of acquired businesses is a difficult process and it is not certain that every integration will be successful. Therefore, costs related to acquisitions can be higher and/or synergies can take longer to materialize than anticipated.

Risks related to the war in Ukraine

Atlas Copco's financial exposure to Russia and Ukraine is limited. During 2022, revenues from Russia accounted for less than 1% of the Group's total revenues. Ukraine accounted for well below 0.1% of the Group's total revenues. Further, Atlas Copco has no production units in Russia or Ukraine. Hence the ongoing war has very limited direct financial effects on Atlas Copco. Given the uncertainties surrounding the ongoing conflict, it is very difficult to predict potential indirect effects on Atlas Copco. As of June 30, 2023, there is no significant impact on any balance sheet items.

For more information of Atlas Copco's risk management process and further descriptions of risks and how they are handled, see the Annual Report 2022.

Forward-looking statements

Some statements in this report are forward-looking, and the actual outcome could be materially different. In addition to the factors explicitly discussed, other factors could have a material effect on the actual outcome. Such factors include, but are not limited to, general business conditions, fluctuations in exchange rates and interest rates, political developments, the impact of competing products and their pricing, product development, commercialization and technological difficulties, interruptions in supply, and major customer credit losses.

Atlas Copco AB

Atlas Copco AB and its subsidiaries are sometimes referred to as the Atlas Copco Group, the Group or Atlas Copco. Atlas Copco AB is also sometimes referred to as Atlas Copco. Any mentioning of the Board of Directors, the Board or the Directors refers to the Board of Directors of Atlas Copco AB.

Fair value of derivatives, cash equivalents and borrowings

The carrying value and fair value of the Group's outstanding derivatives, liquidity funds and borrowings are shown in the tables below. The fair values of bonds are based on level 1 and the fair values of derivatives, liquidity funds and other loans are based on level 2 in the fair value hierarchy. Compared to 2022, no transfers have been made between different levels in the fair value hierarchy for derivatives and borrowings and no significant changes have been made to valuation techniques, inputs or assumptions. Liquidity funds, reported under cash equivalents, are according to IFRS 9 classified at fair value through profit and loss. For further information, see note 27 in the Annual Report 2022.

*Annual revenues and number of employees at time of acquisition/divestment. No revenues are disclosed for former Atlas Copco distributors.

Due to the relatively small size of most of the acquisitions made in 2023, full disclosure as per IFRS 3 is not given in this interim report.

Disclosure on an aggregated level will be given in the Annual Report 2023. See the Annual Report for 2022 for disclosure of acquisitions made in 2022.

- of which A shares held by Atlas Copco	45 472 943
- of which B shares held by Atlas Copco	-
Total shares outstanding, net of shares held by Atlas Copco	4 872 979 473

Performance-based personnel option plan

The Annual General Meeting 2023 approved a performance-based long-term incentive program. For Group Management and division presidents, the plan requires management's own investment in Atlas Copco shares. The intention is to cover Atlas Copco's obligation under the plan through the repurchase of the company's own shares. For further information, see www.atlascopcogroup.com/agm

Transactions in own shares

Atlas Copco has mandates to acquire and sell own shares as per below:

- Acquisition of not more than 14 810 000 series A shares, whereof a maximum of 10 450 000 may be transferred to personnel stock option holders under the performance-based stock option plan for 2023.
- Acquisition of not more than 60 000 series A shares to hedge the obligation of the company to pay remuneration to board members who have chosen to receive 50% of the remuneration in synthetic shares.

- The sale of not more than 60 000 series A shares to cover costs related to previously issued synthetic shares to board members.
- The sale of a maximum 33 000 000 series A shares currently held by the company, for the purpose of covering costs of fulfilling obligations related to the option plans 2017, 2018 and 2019, 2020.
- The shares may only be acquired or sold on NASDAQ Stockholm at a price within the registered price interval at any given time.

During the first six months in 2023, 4 622 508 series A shares, net, were sold. These transactions are in accordance with mandates granted. The company's holding of own shares at the end of the period appears in the table to the left.

Risks and factors of uncertainty

Financial risks

Atlas Copco AB is subject to currency risks, funding risks, interest rate risks, tax risks, and other financial risks. In line with the overall goals with respect to growth, return on capital, and protecting creditors, Atlas Copco has adopted a policy to control the financial risks to which Atlas Copco AB and the Group is exposed. A financial risk management committee meets regularly to manage and follow up financial risks, in line with the policy.

For further information, see the Annual Report 2022.

Related parties

There have been no significant changes in the relationships or transactions with related parties for the Group or Parent Company compared with the information given in the Annual Report 2022.

This is Atlas Copco

The Atlas Copco Group is a world-leading provider of sustainable productivity solutions, demanded by all types of industries, enabling everything from industrial automation to reliable medical air solutions. The Group offers innovative compressors, air treatment systems, vacuum solutions, industrial power tools and assembly systems, machine vision, and power and flow solutions. Atlas Copco develops products and services focused on productivity, energy efficiency, safety and ergonomics, supported by insights from connected products. The company was founded in 1873, is based in Nacka, Sweden, and has a global reach spanning more than 180 countries. In 2022, Atlas Copco had revenues of BSEK 141 and about 49 000 employees at year end.

Business areas

Atlas Copco has four business areas. The business areas are responsible for developing their respective operations by implementing and following up on strategies and objectives to achieve sustainable, profitable growth.

The **Compressor Technique** business area provides compressed air solutions; industrial compressors, gas and process compressors and expanders, air and gas treatment equipment, and air management systems. The business area has a global service network and innovates for sustainable productivity in the manufacturing and process industries. Principal product development and manufacturing units are located in Belgium, the United States, China, India, Germany, and Italy.

The **Vacuum Technique** business area provides vacuum products, exhaust management systems, valves and related products. The main markets served are semiconductor and scientific instruments as well as a wide range of industrial segments including chemical process industries, food packaging and paper handling. The business area has a global service network and innovates for sustainable productivity in order to further improve its customers' performance. Principal product development and manufacturing units are located in the United States, Mexico, United Kingdom, Czech Republic, Germany, South Korea, China, and Japan.

The **Industrial Technique** business area provides industrial power tools, assembly and machine vision solutions, quality assurance products, software, and service through a global network. The business area innovates for sustainable productivity for customers in the automotive and general industries. Principal product development and manufacturing units are located in Sweden, Germany, Hungary, United Kingdom, France, the United States, China, and Japan.

The **Power Technique** business area provides portable air and power, industrial and portable flow solutions through products such as mobile compressors, generators, light towers, industrial and portable pumps, along with a number of complementary products. It also offers specialty rental and provides service through a global network. Guided by a forward-thinking approach to innovation, Power Technique provides sustainable productivity solutions across multiple industries, including construction,

manufacturing, oil and gas, and exploration drilling. Principal product development and manufacturing units are located in Belgium, Spain, Germany, the United States, China, and India.

Vision, mission and strategy

The Atlas Copco Group's vision is to become and remain First in Mind—First in Choice of its customers and other principal stakeholders. The mission is to achieve sustainable, profitable growth. Sustainability plays an important role in Atlas Copco's vision and it is an integral aspect of the Group's mission. An integrated sustainability strategy, backed by ambitious goals, helps the company deliver greater value to all its stakeholders in a way that is economically, environmentally and socially responsible.

Auditors' Review Report (translation of the Swedish original)

Atlas Copco AB (publ), Corp. Reg. No. 556014-2720

Introduction

We have reviewed this interim report for Atlas Copco AB (publ.) as per June 30, 2023, and the six-month period then ended. The Board of Directors and the President are responsible for the preparation and presentation of this interim financial information in accordance with IAS 34 and the Swedish Annual Accounts Act. Our responsibility is to express a conclusion on this interim report based on our review.

Approach and scope of the review

We conducted our review in accordance with the International Standard on Review Engagements, ISRE 2410, *Review of Interim Report Performed by the Independent Auditor of the Entity*. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope

than an audit conducted in accordance with International Standards on Auditing (ISA) and other generally accepted auditing practices.

The procedures performed in a review do not enable us to obtain a level of assurance that would make us aware of all significant matters that might be identified in an audit. Therefore, the conclusion based on a review does not give the same level of assurance as a conclusion based on an audit.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim report is not prepared, in all material respects, in accordance with IAS 34 and the Annual Accounts Act for the Group, and in accordance with the Annual Accounts Act for the Parent Company.
