

Q3 results 2026

October 22, 2026

Atlas Copco Group

Q3 summary

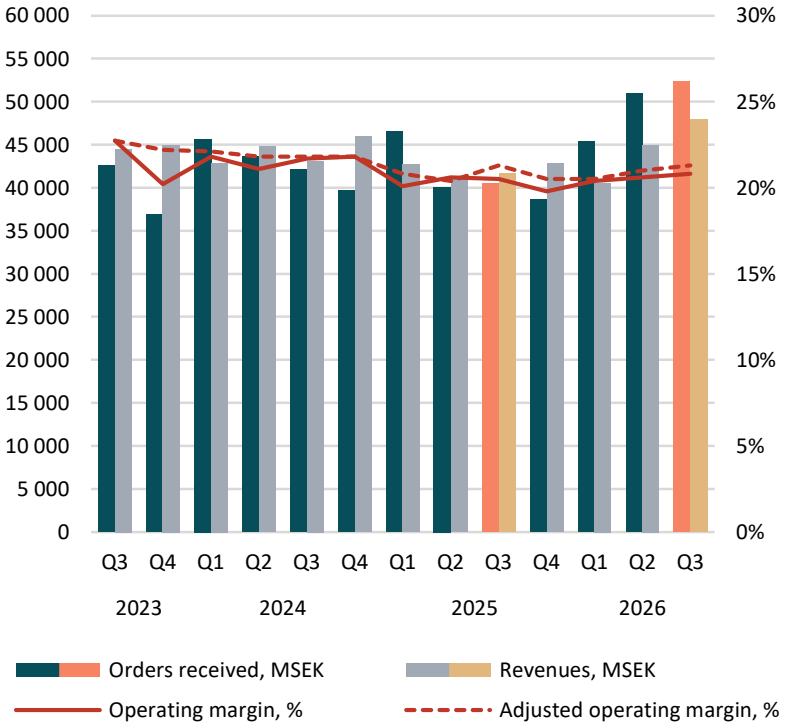

- Strong order intake
  - Growth for industrial as well as gas and process compressors
  - Record demand for vacuum equipment
  - Double-digit growth for industrial assembly equipment and vision solutions
  - Strong growth for power equipment
  - Continued growth for service
- Record revenues
- Stable profit margin year-on-year, sequential improvement
- Solid operating cash flow
- 4 acquisitions closed

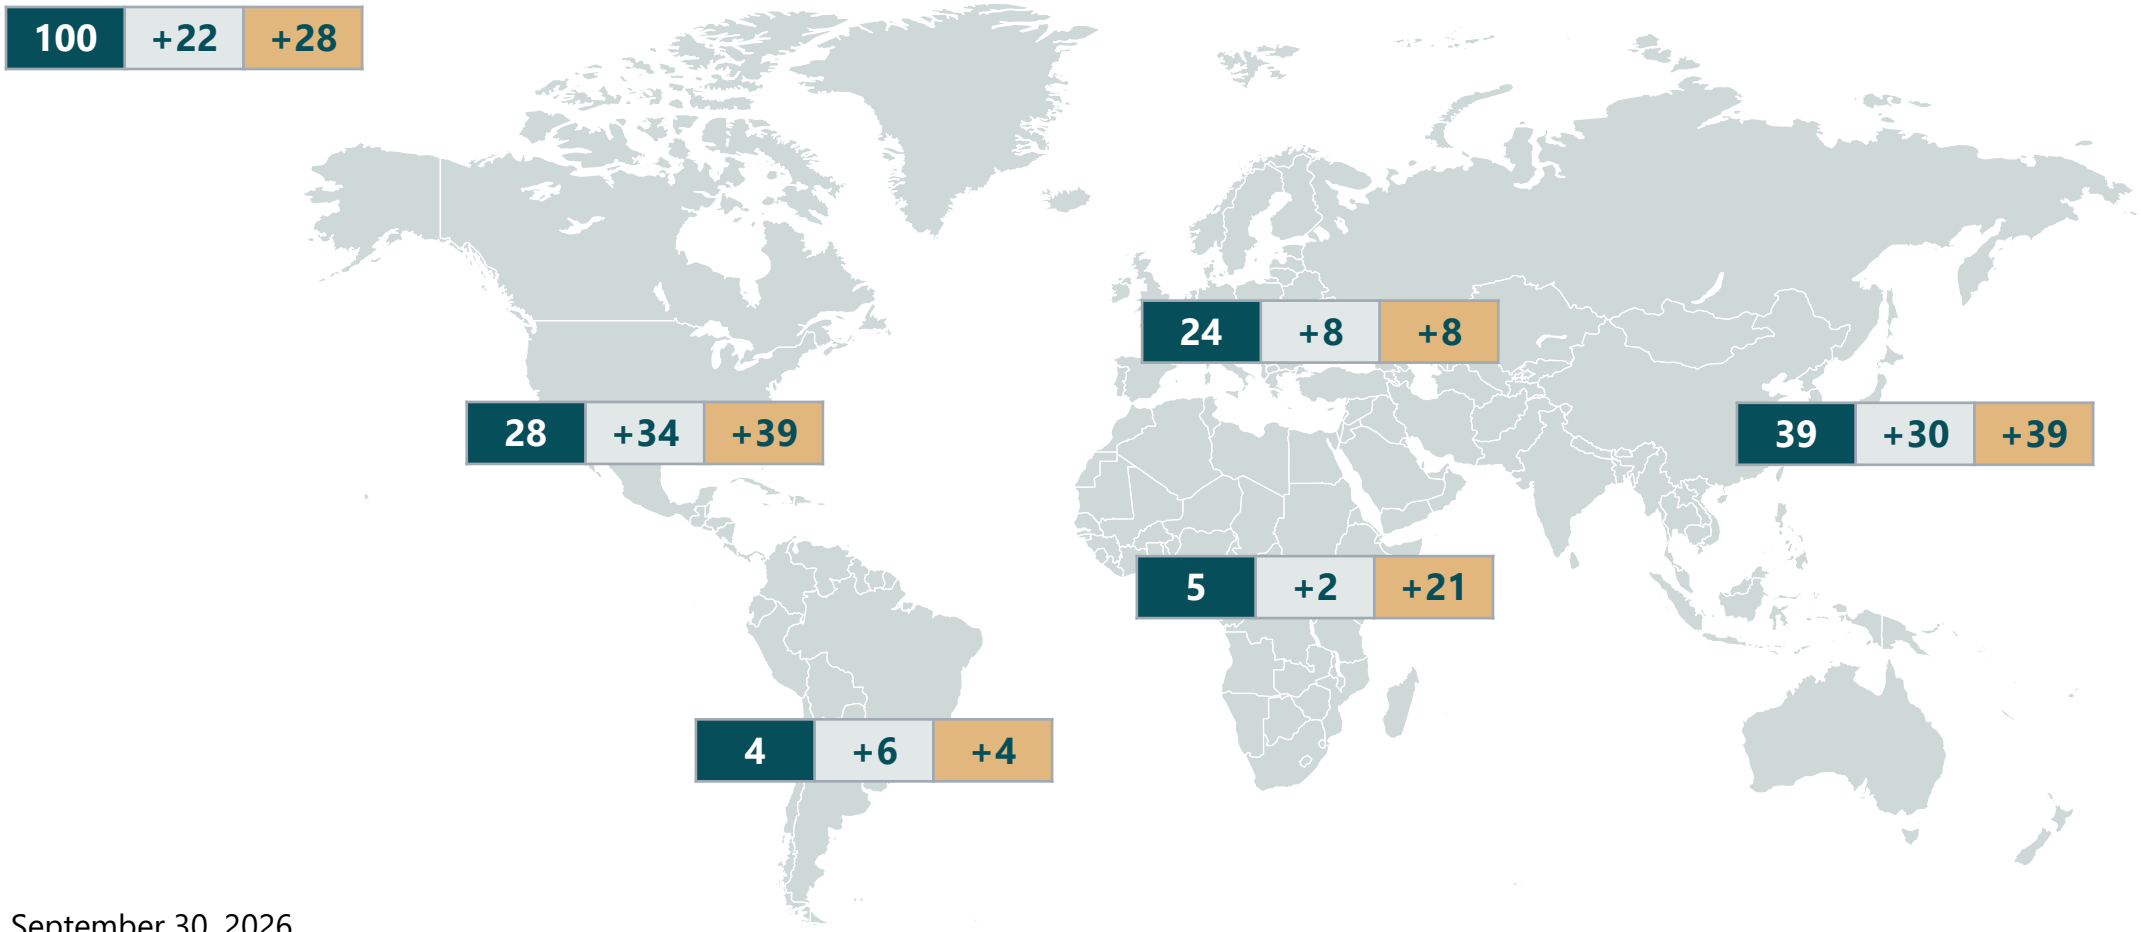

Q3 financials

- Orders received were MSEK 52 338 (40 517), organic increase of 25%
- Revenues reached MSEK 47 920 (41 621), organic increase of 11%
- Operating profit at MSEK 9 950 (8 546), margin of 20.8% (20.5)
  - Adjusted operating profit at MSEK 10 195 (8 862), margin of 21.3% (21.3)
- Profit for the period, MSEK 7 736 (6 675)

- Basic earnings per share at SEK 1.58 (1.37)
- Operating cash flow at MSEK 8 728 (7 330)
- Return on capital employed at 24% (25)

Orders received and organic order growth per business area

Share of Group orders received 12 months ending September 2026.
3-month organic order development compared to previous year.

Compressor Technique

- Organic order growth of 6%
  - Solid demand for industrial compressors
  - Notable growth for gas and process compressors
  - Service order growth
- Revenue increase of 5% organically
- Operating profit margin at 23.6% (25.3)
  - Negatively affected by currency, sales mix, and higher supply chain costs
- ROCE at 72% (80)

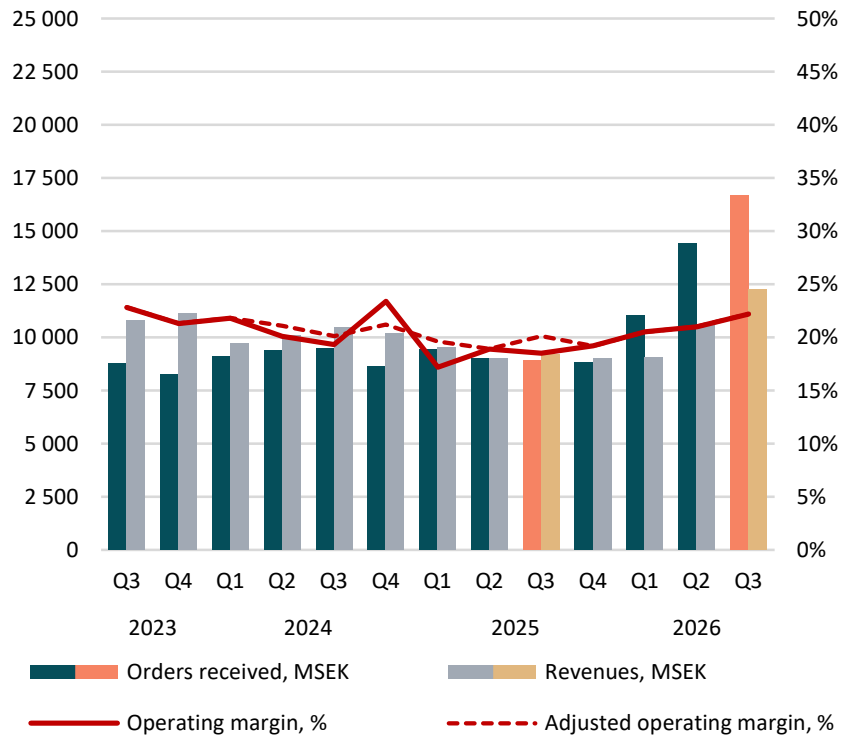

Innovation:
The new TVD22-29 dry cooler range delivers stable thermal performance and precise temperature control for industrial cooling applications.

Vacuum Technique

- 82% organic order growth
  - Record orders for semiconductor equipment
  - Industrial and scientific vacuum equipment also reached a record
  - Growth for service
- Record revenues, up 28% organically
- Operating profit margin at 22.2% (18.5)
  - Driven by increased volumes
  - Negatively affected by capacity ramp-up and currency
- ROCE at 21% (18)

Innovation:
A new range of industrial vacuum pumps, the Atlas Copco GHS 402-1002 VSD+, features a compact design, low noise level, and high energy efficiency.

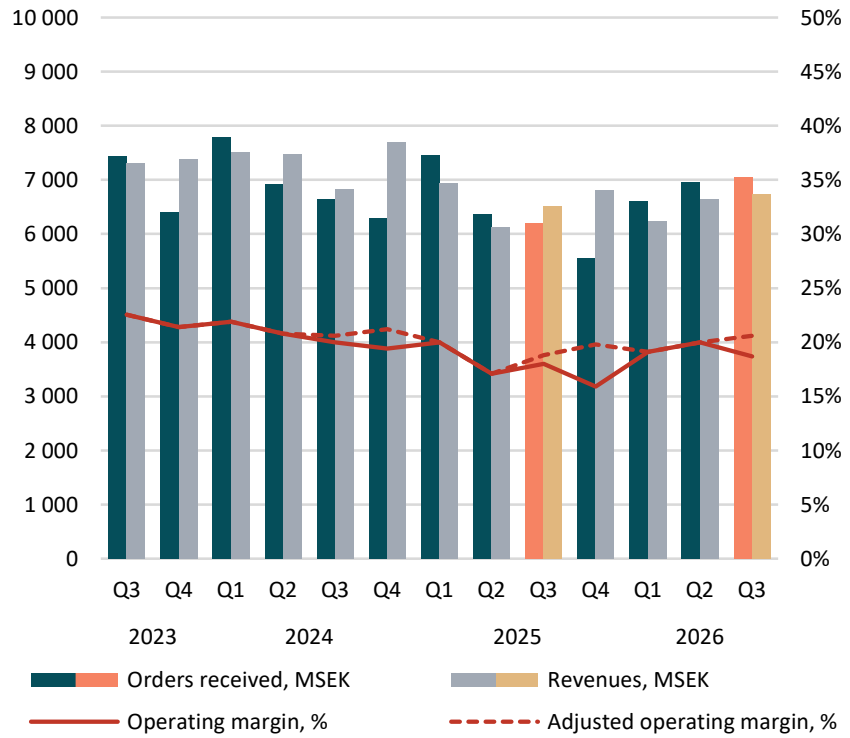

Industrial Technique

- Orders up 12% organically
  - Notable growth for general industry
  - Solid growth for automotive equipment
  - Growth for service
- Revenues up 2% organically
- Operating profit margin at 18.7% (18.0)
  - Adjusted for restructuring costs 20.6% (18.8)
  - Positively affected by a combined volume, price and mix effect, and decreased costs related to trade tariffs
- ROCE at 18% (18)

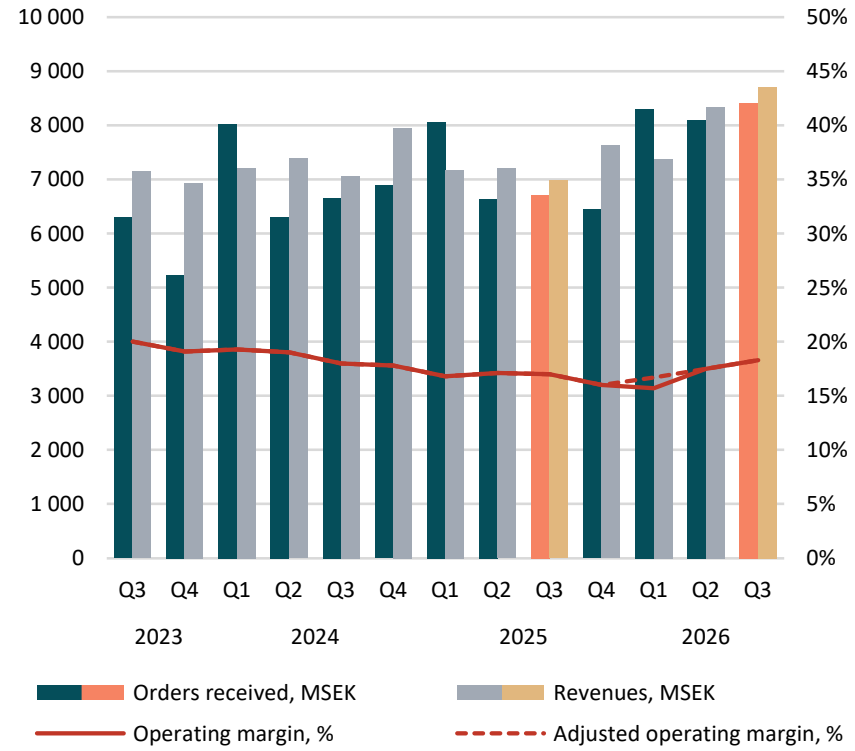

Innovation:
A new Smart Tensioning System (STS) for large bolts, offering improved safety, repeatability, efficiency, and process control.

Power Technique

- Organic order growth of 13%
  - Improved equipment demand
  - Growth for specialty rental
  - Continued growth for service
- Record revenues, up 14% organically
- Operating profit margin at 18.3% (17.0)
  - Supported by the combination of volume, price and mix, and a positive acquisition effect
  - Negatively affected by currency
- ROCE at 13% (15)

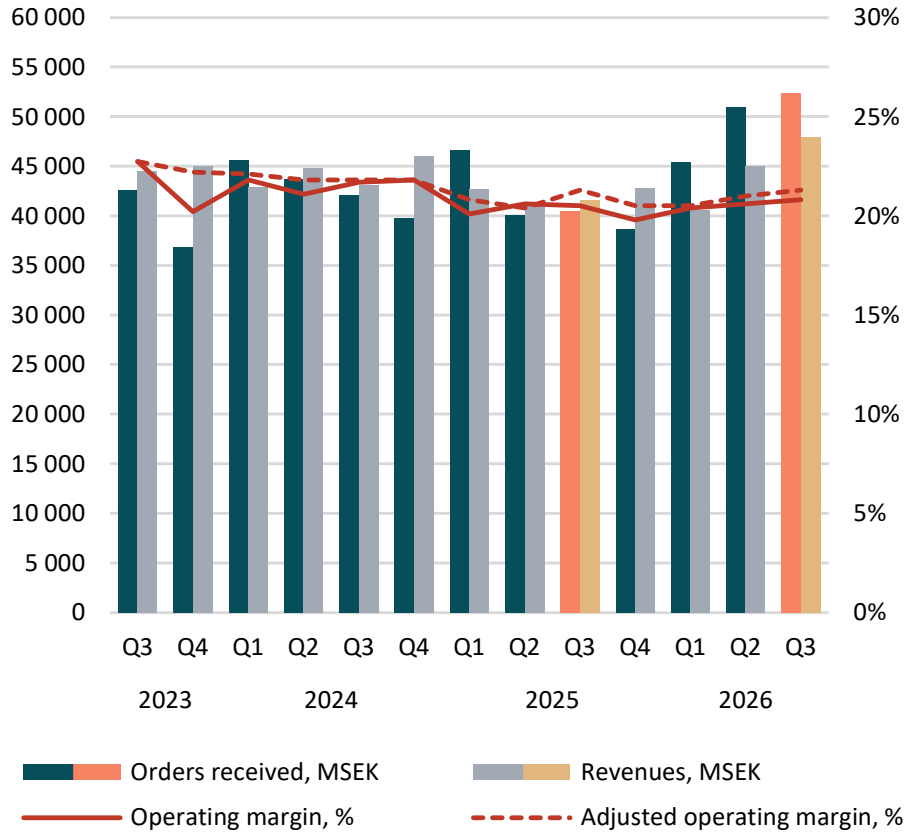

Innovation:
The new QAC 1000 TwinPower™ portable generator for variable-load applications features an integrated Power Management System that improves energy efficiency and reduces emissions.

Atlas Copco Group

Near-term outlook

Atlas Copco Group expects the customer activity to remain at the current level.

Atlas Copco Group

Technology that transforms the future

Forward-looking statements

“Some statements in this report are forward-looking, and the actual outcome could be materially different. In addition to the factors explicitly discussed, other factors could have a material effect on the actual outcome. Such factors include, but are not limited to, general business conditions, fluctuations in exchange rates and interest rates, political developments, the impact of competing products and their pricing, product development, commercialization and technological difficulties, interruptions in supply, and major customer credit losses.”
