

January 27, 2026

Atlas Copco Group

Interim report on Q4 and full-year summary 2025

Organic order growth, solid revenues and cash flow

The comparison figures presented in this report refer to previous year unless otherwise stated.

Fourth quarter

- Orders received reached MSEK 38 606 (39 725), organic increase of 4%
- Revenues decreased 7% to MSEK 42 782 (45 988), organically unchanged
- Adjusted operating profit, excluding items affecting comparability, was MSEK 8 772 (10 029), corresponding to a margin of 20.5% (21.8)
 - Reported operating profit decreased 15% to MSEK 8 470 (10 018), corresponding to a margin of 19.8% (21.8)
- Profit before tax amounted to MSEK 8 338 (9 981)
- Basic earnings per share were SEK 1.36 (1.60)
- Operating cash flow at MSEK 6 777 (9 915)
- Return on capital employed was 24% (28)
- The Board of directors proposes:
 - An ordinary dividend for 2025 of SEK 3.00 (3.00) per share, and an extra distribution of SEK 2.00 per share, resulting in a total combined dividend of SEK 5.00 per share to be paid in two equal installments

Summary of full-year 2025

Orders and revenues

Orders received in 2025 reached MSEK 165 814 (171 115), with a negative currency effect of 6%. Organically the order intake increased 1%. Acquisitions added 2%. Revenues reached MSEK 168 343 (176 771), corresponding to an organic decline of 1%. Currency had a negative effect of 6%, while acquisitions added 2%.

Orders, revenues, and operating profit margin

* 2016 figures are best estimated numbers, as the effects of the split of the Group and restatements for IFRS 15 are not fully reconciled.

Results and cash flow

Operating profit decreased 11% to MSEK 34 114 (38 166), corresponding to a margin of 20.3% (21.6). Items affecting comparability amounted to MSEK -800 (-575), whereof the change in provision for share-related long-term incentive programs, reported in Common Group Items was MSEK -102 (-268). Other items affecting comparability includes restructuring costs of total MSEK -698 in the business areas Vacuum Technique and Industrial Technique. Adjusted operating profit decreased 10% to MSEK 34 914 (38 741) corresponding to a margin of 20.7% (21.9). Changes in exchange rates compared with the previous year had a

negative effect of MSEK -3 400 on the operating profit and approximately a 0.6 percentage point negative effect on the operating margin.

Profit before tax amounted to MSEK 33 671 (37 800), corresponding to a margin of 20.0% (21.4). Income tax expense amounted to MSEK 7 246 (8 006), corresponding to an effective tax rate of 21.5% (21.2).

Profit for the period was MSEK 26 425 (29 794). Basic and diluted earnings per share were SEK 5.43 (6.11) and SEK 5.42 (6.10), respectively.

Operating cash flow (important internal KPI, but not an IFRS measurement, and hence reconciled on page 14) before acquisitions, divestments and dividends reached MSEK 26 796 (30 981).

Dividend

The Board of Directors proposes to the Annual General Meeting 2026 an ordinary dividend of SEK 3.00 (3.00) per share for the 2025 fiscal year, and an additional distribution of SEK 2.00 per share resulting in a total combined dividend of SEK 5.00 per share. This corresponds to a total capital distribution of MSEK 24 353 (14 606) to shareholders, and excludes shares currently held by the company.

To facilitate a more efficient cash management, the total combined dividend is proposed to be paid in two equal installments of SEK 2.50 each, the first with record date April 30, 2026, and the second with record date October 20, 2026.

Personnel stock option program

The Board of Directors will propose to the Annual General Meeting a similar performance-based long-term incentive program as in the previous years. For Group Management and division presidents, participation in the plan will require own investment in Atlas Copco AB shares. The details of the proposal will be communicated in connection with the Notice of the Annual General Meeting.

Revenues, profits and returns

Revenues reached MSEK 42 782 (45 988), organically unchanged. Currency had a negative effect of 11%, while acquisitions added 4%.

The operating profit was MSEK 8 470 (10 018) and includes a change in provision for share-related long-term incentive programs (LTI), reported in Common Group Items, of MSEK -41 (+30). Other items affecting comparability were restructuring costs in the Industrial Technique business area of MSEK -261. Apart from LTI related change of provisions, previous year included items affecting comparability of MSEK -41 in total.

Adjusted operating profit decreased 13% to MSEK 8 772 (10 029), corresponding to a margin of 20.5% (21.8). The main reasons for the lower margin were a strong negative currency effect, and to a lesser extent, increased costs related to trade tariffs and dilution from acquisitions.

Net financial items amounted to MSEK -132 (-37) whereof interest net at MSEK -95 (-55). Other financial items, including financial exchange differences, were MSEK -37 (18). Profit before tax amounted to MSEK 8 338 (9 981), corresponding to a margin of 19.5% (21.7). Corporate income tax amounted to MSEK -1 711 (-2 181), corresponding to an effective tax rate of 20.5% (21.9). The lower effective tax rate is mainly due to utilization of R&D and similar tax benefits. Profit for the period was MSEK 6 627 (7 800). Basic and diluted earnings per share were SEK 1.36 (1.60) and SEK 1.36 (1.60), respectively.

The return on capital employed during the last 12 months was 24% (28). Return on equity was 24% (29). The Group uses a weighted average cost of capital (WACC) of 8.0% as an investment and overall performance benchmark.

Operating cash flow and investments

Operating cash surplus decreased to MSEK 10 951 (12 105). Net financial items and taxes paid amounted to MSEK -2 543 (-1 867). Working capital decreased by MSEK 649 (decrease of 2 305). The main reason for the difference compared to the previous year was a smaller decrease of inventories. Net investments in rental equipment were MSEK -497 (-596), and in property, plant and equipment MSEK -1 038 (-1 067).

Operating cash flow (an important internal KPI, but not a measurement defined in IFRS Accounting Standards, and hence defined on page 14) reached MSEK 6 777 (9 915).

Net indebtedness

The Group's net indebtedness amounted to MSEK 20 665 (18 102), of which MSEK 1 883 (2 740) was attributable to post-employment benefits. The Group's interest-bearing liabilities have an average maturity of 4.6 years. The net debt/EBITDA ratio was 0.5 (0.4) and the net debt/equity ratio was 19% (16).

Acquisition and divestment of own shares

During the quarter, 1 292 011 series A shares, net, were sold for a net value of MSEK 213. These transactions are in accordance with mandates granted by the Annual General Meeting and relate to the Group's long-term incentive programs. See page 18.

Employees

On December 31, 2025, the number of employees was 56 413 (55 146). The number of consultants/external workforce was 3 077 (3 001). For comparable units, the total workforce decreased by 642 from December 31, 2024.

*Volume, price and mix.

Industrial compressors

The demand for industrial compressors increased somewhat compared to the previous year. Order volumes for large-sized compressors developed more favorably than for smaller ones, compared to a relatively weak quarter for larger compressors previous year. Sequentially, the order intake decreased.

Geographically, compared to the previous year, orders increased in all major regions.

Gas and process compressors

Order volumes for gas and process compressors increased significantly compared to the previous year, driven by increased demand from several different customer segments.

Geographically, strong order growth was achieved in Asia, while the orders in North America were unchanged and decreased in Europe and Africa/Middle East.

Compressor service

The demand for service remained good, and solid order growth was achieved in most regions.

Innovation

A new nitrogen generator design for laser cutting applications, the LCN2, was introduced. The new product is compact and enables customers to produce nitrogen efficiently on-site. Supported by integrated filtration and a built-in booster, the generator ensures the right nitrogen purity, quality, flow, and pressure for various specific laser cutting applications.

Acquisitions

The following acquisitions were closed in the quarter:

- SUTO iTEC, a compressed air and gas measurement company headquartered in China with 136 employees, and revenues of approximately MSEK 176 in 2024.
- RM Boggs Inc., a US based distributor with 3 employees
- Northern Compressed Air Ltd., a distributor of compressed air systems and service in the UK with 15 employees.
- MKG Equipamentos Ltda., a manufacturer of industrial process filtrations in Brazil with 30 employees and revenues of about MSEK 90 in 2024.
- Engineering Automation Systems GmbH, an engineering process automation company in Germany with 18 employees and revenues of approximately MSEK 30 in 2024.
- Anglian Compressors and Equipment Ltd., a UK compressor distributor with 28 employees.

Revenues and profitability

Revenues decreased 4% to MSEK 19 540 (20 382), corresponding to an organic increase of 3%.

The operating profit decreased 7% to MSEK 4 752 (5 110), corresponding to a margin of 24.3% (25.1), negatively affected by acquisitions, sales mix, and increased costs related to trade tariffs. Currency had no material effect on the operating margin. Return on capital employed (last 12 months) was 78% (85).

Semiconductor and flat panel display equipment

The order intake for vacuum equipment to the semiconductor and flat panel display industry increased notably compared to the previous year's relatively low level. Compared to the previous quarter, the order intake also increased.

Geographically, compared to the previous year, order volumes increased in Europe, Asia and North America.

Industrial and scientific vacuum equipment

The overall demand for industrial and scientific vacuum equipment improved, and solid order growth was achieved from both general industrial customers and scientific vacuum applications. Sequentially, the order intake remained basically unchanged.

Year-on-year, the order intake increased in Asia and Europe, while remaining essentially unchanged in North America.

Vacuum service

The demand for service from the semiconductor industry and general industrial customers increased. Order volumes increased in all major regions, particularly in Asia.

Innovation

The business area introduced a new product for semiconductor production processes that require higher throughput and lower pressures, the Vertical Mechanical Booster. The new product is packaged vertically to minimize floor space requirements. Unlike other solutions, this compact form enables close proximity to the process tool, maximizing performance in the vacuum chamber.

Revenues and profitability

Revenues decreased 11% to MSEK 9 025 (10 189), corresponding to an organic decline of 3%.

The operating profit reached MSEK 1 730 (2 381). Previous year included items affecting comparability of MSEK +222. The operating profit margin was 19.2% (23.4, adjusted 21.2). The main reason for the lower margin was a negative currency effect, although dilution from recent acquisitions also affected the margin negatively. Return on capital employed (last 12 months) was 17% (20).

Automotive industry

The order intake for industrial assembly and vision solutions to the automotive industry decreased, both compared to the previous year and sequentially.

Geographically, compared to the previous year, orders decreased in North America and Asia, but remained basically unchanged in Europe.

General industry

Order volumes for industrial power tools, assembly equipment, and vision solutions to the general industry increased compared to the previous year and sequentially. The year-on-year order growth was supported by increased demand from the aerospace, electronics, and off-highway industries.

Compared to the previous year, orders increased in the Americas, remained basically unchanged in Asia, but decreased in Europe.

Service

Orders for service remained at about the same level as in the previous year.

Innovation

A new automatic robot guidance solution was introduced in the quarter, the Desoutter ARG. The new 3D vision system is designed to transform tightening and drilling operations on customers' production lines. Supported by adaptive vision and advanced multi-type detection capability, the new product offers improved repeatability and increased flexibility in automation in customers' production.

Revenues and profitability

Revenues decreased 12% to MSEK 6 808 (7 705), corresponding to an organic decline of 3%.

The operating profit reached MSEK 1 084 (1 496) and includes items affecting comparability of MSEK -261, attributed to restructuring costs mainly in Germany. Previous year included restructuring costs of MSEK -134. The adjusted operating profit margin reached 19.8% (21.2). The lower margin was mainly due to a negative currency effect, increased costs related to trade tariffs, and to a lesser extent dilution from acquisitions. Return on capital employed (last 12 months) was 17% (21).

Organic*, %	-6	-4
Total, %	-6	-4
2025	6 440	7 628

*Volume, price and mix.

Equipment

The overall demand for equipment such as portable compressors, generators, and pumps weakened, and the order intake decreased compared to the previous year and sequentially. The lower order volumes compared to the previous year were mainly due to lower order intake for portable compressors and industrial pumps.

Year-on-year, the order intake decreased in all regions except Europe, where the order intake increased.

Specialty rental

The demand for the specialty rental business decreased somewhat compared to the previous year, but due to contributions from acquisitions, the order intake increased significantly. Sequentially, the organic orders remained unchanged.

Geographically, compared to the previous year, the order intake increased in the Americas but decreased in Europe and Asia.

Service

Orders for service increased, driven by increased demand in most regions.

Innovation

A new range of portable chopper pumps was introduced, the PAX F44 & PAX F66. These pumps are designed to withstand demanding applications and deliver high pumping efficiency across segments such as construction, municipal, and general dewatering. Thanks to their chopper design and large solids handling capacity up to 4", they are ideal for pumping sewage, sludge, and agricultural slurries.

Acquisitions

The following acquisitions were closed in the quarter:

- CRI-MAN S.p.A., an Italian industrial pump manufacturer with 85 employees and revenues of approximately MSEK 342 in 2024.
- National Tank & Equipment, LLC, an American specialty rental company with 349 employees and revenues of approximately BSEK 2.1 in 2024.

Revenues and profitability

Revenues reached MSEK 7 628 (7 957), corresponding to an organic decrease of 4%.

The operating profit decreased 14% to MSEK 1 223 (1 415), corresponding to a margin of 16.0% (17.8). The main explanations for the lower margin were a negative currency effect, lower utilization of the rental fleet, higher functional costs in relation to sales, and increased costs related to trade tariffs. Acquisitions only had a marginal dilutive effect on the margin. Return on capital employed (last 12 months) was 14% (18).

Orders, revenues, and operating profit margin

Accounting principles

The interim condensed consolidated financial statements presented in this interim report have been prepared in accordance with IAS 34 Interim Financial Reporting. The description of the accounting principles and definitions applied in this report are found in the [Annual Report 2024](#). Other financial measures than the ones defined in IFRS Accounting Standards are also presented in the report since they are considered to be important supplemental measures of the company's performance. For further information about these measures and how they have been calculated, please visit our [Key financials page](#).

Risks, risk management and factors of uncertainty

Atlas Copco Group's global and diversified business is active within many customer segments and results in a variety of risks and opportunities geographically and operationally. Thus, the ability to identify, analyze and manage risks is crucial for effective governance and control of the business. The aim is to meet the Group's goals with a high awareness of risks and well-managed risk taking. Atlas Copco Group sees the benefits of an efficient risk management both from risk reduction and business opportunity perspectives, which can lead to good business growth.

Risks in Atlas Copco Group are identified in a 360-degree spectrum, meaning that both internal, and external exposures are assessed, including today's circumstances and future changes. The Group's risk management approach follows the decentralized structure of Atlas Copco Group. Risks are analyzed and addressed in an integrated way. Local companies are responsible for their own risk management, which is monitored and followed up regularly at for example local business board meetings. Group functions responsible for legal, insurance, human resources, compliance, sustainability, treasury, tax, controlling and accounting provide policies, guidelines and instructions regarding risk management.

Risk areas include compliance risks, external exposure risks, including pandemics, operational risks and strategic risks. These risk areas can impact the business negatively both in the long and short term, but often also create business opportunities if managed well. Examples of risks and how they are handled is described below.

Market risks

The demand for Atlas Copco Group's equipment and services is affected by changes in the customers' investment and production levels. A general economic downturn, geopolitical tensions, pandemics, changes in trade agreements, trade sanctions, tariffs, a widespread financial crisis and other macroeconomic disturbances may, directly or indirectly, affect the Group negatively both in terms of revenues and profitability. However, the Group's sales are well diversified with customers in many industries and countries around the world, which mitigates the risk.

Financial risks

Atlas Copco Group is subject to currency risks, funding risks, interest rate risks, tax risks, and other financial risks. In line with the overall goals with respect to growth, return on capital, and protecting creditors, Atlas Copco Group has adopted a policy to control the financial risks to which the Group is exposed. A financial risk management committee meets regularly to manage and follow up financial risks, in line with the policy.

Production risks

A large part of the components used in production are sourced from sub-suppliers. The availability is dependent on the sub-suppliers and if they have interruptions or lack capacity, this may adversely affect production. To minimize these risks, Atlas Copco Group has established a global network of sub-suppliers, which means that in most cases there are more than one sub-supplier that can provide a certain component. Atlas Copco Group is also directly and indirectly exposed to raw material prices. Cost increases for raw materials and components often coincide with strong end-customer demand and can partly be compensated for by increased sales prices.

Acquisitions

Atlas Copco Group has the ambition to grow all its business areas, primarily through organic growth, supplemented by selected acquisitions. The integration of acquired businesses is a difficult process and it is not certain that every integration will be successful. Therefore, costs related to acquisitions can be higher and/or synergies can take longer to materialize than anticipated.

For more information on Atlas Copco Group's risk management process and further descriptions of risks and how they are handled, see the [Annual Report 2024](#).

Forward-looking statements

Some statements in this report are forward-looking, and the actual outcome could be materially different. In addition to the factors explicitly discussed, other factors could have a material effect on the actual outcome. Such factors include, but are not limited to, general business conditions, fluctuations in exchange rates and interest rates, political developments, the impact of competing products and their pricing, product development, commercialization and technological difficulties, interruptions in supply, and major customer credit losses.

Atlas Copco AB

Atlas Copco AB is a public company. Atlas Copco AB and its subsidiaries are often referred to as Atlas Copco Group, the Group or the company. Any mentioning of the Board of Directors or the Board refers to the Board of Directors of Atlas Copco AB.

Fair value of derivatives, cash equivalents and borrowings

The carrying value and fair value of the Group's outstanding derivatives, liquidity funds, and borrowings are shown in the tables below. The fair values of bonds are based on Level 1, the fair values of derivatives, liquidity funds, and other loans are based on Level 2, and contingent considerations are based on Level 3 in the fair value hierarchy. Compared to 2024, no transfers have been made between different levels in the fair value hierarchy for derivatives and borrowings, and no significant changes have been made to valuation techniques, inputs, or assumptions. For further information, see Note 26 in the [Annual Report 2024](#).

* Full list of acquisitions and divestments for previous years can be found at [Atlas Copco Group's website](#).

** Annual revenues and number of employees at time of acquisition/divestment. No revenues are disclosed for former Atlas Copco distributors. Due to the relatively small size of most of the acquisitions made in 2025, full disclosure as per IFRS 3 is not given in this interim report. Disclosure on an aggregated level will be given in the Annual Report 2025. See the [Annual Report 2024](#) for disclosure of acquisitions made in 2024.

Total	4 918 452 416
- of which A shares held by Atlas Copco AB	47 864 891
- of which B shares held by Atlas Copco AB	0
Total shares outstanding, net of shares held by Atlas Copco AB	4 870 587 525

Performance-based personnel option plan

The Annual General Meeting 2025 approved a performance-based long-term incentive program. For Group Management and division presidents, the plan requires management's own investment in Atlas Copco shares. For further information, see: [General meeting page](#).

Transactions in own shares

Atlas Copco AB has mandates to acquire and sell own shares as per below:

- The acquisition of not more than 9 500 000 series A shares related to personnel option plan for 2025.
- The acquisition of not more than 60 000 series A shares, later to be sold on the market in connection with payment to Board members who have opted to receive synthetic shares as part of their remuneration.
- The sale of not more than 60 000 series A shares to cover costs, primarily social charges, related to previously issued synthetic shares to Board members.

- The sale of a maximum of 29 300 000 series A shares currently held by the company, for the purpose of covering costs of fulfilling obligations related to the performance-based personnel option plans 2018, 2019, 2020, 2021 and 2022.
- The shares may only be acquired or sold on NASDAQ Stockholm at a price within the registered price interval at any given time.

During 2025, 26 457 series A shares, net, were acquired. These transactions are in accordance with mandates granted. The company's holding of own shares at the end of the period appears in the table to the left.

Risks and factors of uncertainty

Financial risks

Atlas Copco AB is subject to currency risks, funding risks, interest rate risks, tax risks, and other financial risks. In line with the overall goals with respect to growth, return on capital, and protecting creditors, Atlas Copco AB has adopted a policy to control the financial risks to which Atlas Copco AB and the Group is exposed. A financial risk management committee meets regularly to manage and follow up financial risks, in line with the policy.

For further information, see the [Annual Report 2024](#).

Related parties

There have been no significant changes in the relationships or transactions with related parties for the Group or Parent Company compared with the information given in the [Annual Report 2024](#).

This is Atlas Copco Group

Atlas Copco Group enables technology that transforms the future. We innovate to develop products, services, and solutions that are key to our customers' success. Our four business areas offer compressed air and gas solutions, vacuum solutions, energy solutions, dewatering and industrial pumps, industrial power tools, and assembly and machine vision solutions. In 2025, the Group had revenues of BSEK 168 and about 56 000 employees at year-end.

Business areas

Atlas Copco Group has four business areas. The business areas are responsible for developing their respective operations by implementing and following up on strategies and objectives to achieve sustainable, profitable growth.

The **Compressor Technique** business area provides compressed air and gas solutions such as industrial compressors, gas and process compressors and expanders, air and gas treatment equipment, air management and conversion. The business area has a global service network and innovates technology that transforms the future of the manufacturing and process industries. Principal product development and manufacturing units are located in Belgium, the United States, China, India, Germany, and Italy.

The **Vacuum Technique** business area provides vacuum products, exhaust management systems, cryogenics, maintenance and diagnostics, valves, and related products. The main markets served are semiconductor and scientific instruments, as well as a wide range of industrial segments, including chemical process industries, food packaging, and renewable energy. The business area has a global service network and innovates technology that transforms the future and improves customer performance. Principal product development and manufacturing units are located in the United States, Mexico, United Kingdom, Czech Republic, Germany, South Korea, China, and Japan.

The **Industrial Technique** business area provides industrial power tools, automated assembly and quality control systems including tightening robotics, automatic feeding and machine vision, and services through a global network. The business area innovates technology that transforms the future for customers in the automotive and general industries. Principal product development and manufacturing units are located in Sweden, Germany, Hungary, United Kingdom, France, the United States, China, and Japan.

The **Power Technique business** area provides portable air and power, industrial and portable flow solutions through products such as portable compressors, generators, light and energy management systems, dewatering and industrial pumps, along with a number of complementary products. It also offers specialty rental and provides service through a global network. The business area innovates technology that transforms the future for multiple industries, including infrastructure construction, manufacturing, oil and gas, and exploration drilling. Principal product development and manufacturing units are located in Belgium, Spain, Germany, the United States, China, and India.

Vision, mission and strategy

The Atlas Copco Group's vision is to become and remain First in Mind—First in Choice of its customers and other stakeholders. The mission is to achieve sustainable, profitable growth. This means that we should continuously deliver profitable growth with an increased positive impact on society and the environment and by promoting diversity and inclusion. Inclusion is about providing everyone within our organization with support and inspiration to learn and grow. It also means that we include the perspective of different stakeholders, like customers and society, when we

create value. An integrated sustainability strategy, backed by ambitious goals, helps the company deliver greater value to all its stakeholders in a way that is economically, environmentally, and socially responsible.
