

# Meet some of our leading female engineers

At Atlas Copco Group, we believe that there is always a better way. This spirit drives us to provide leading-edge technology, innovative and sustainable products, as well as best in class service to our customers around the globe.

We are looking for the very best engineers – we are looking for people like you. We believe that diversity inspires creativity, gives us different perspectives, and drives innovative solutions.

Scan the code to hear more from our engineers.

**Alana Guilbault**  
Mechanical Engineer

*"The best thing about being an engineer in Atlas Copco Group is getting to work with great products and technologies. For example, a cryogenic vacuum pump sounds like something out of a sci-fi movie, and I think that's really cool."*

**Amy Ruff**  
Senior Warehouse Engineer

*"Traditionally, engineers don't focus on warehousing and logistics, but they are essential to be more efficient in a world that's moving faster and faster. Working in warehousing and logistics at Atlas Copco Group is a challenging and fulfilling career."*

**Fiona Smith**  
Aerospace Product Engineer

*"The best part about being an engineer is that it's a very rewarding career path. You feel like you're making a difference. At Atlas Copco Group, I work directly with pretty much everything that's going to fly in the next ten years."*

**Homa Ghasemi**  
Cryogenic Technologist

*"At Atlas Copco Group, safety and well-being always come first – people really care about each other. Plus, with so many products and technologies, there is always room for you to learn and grow professionally."*

**Ita Kane**  
Sustaining Engineer

*"I was always very interested in math and science, but I was never interested in a very theoretical path. I felt like engineering was a good mix of those two fields and working at Atlas Copco Group gives me a lot of opportunities to be hands-on and get to know the products inside out."*

**Karina Ortega**  
Technical Support Engineer

*"For me, the Atlas Copco Group is a big family. All the people are very friendly and will always support you with any issues and to help develop your own learning. We have so many products and you always feel like you are learning new things and developing."*

**Lydia Shen**  
Mechanical Engineer and Core Technologist

*"The best part about being an engineer is that every day you have a new challenge and at Atlas Copco Group you are tasked with making things work better than they were before. Whenever I find a solution for a problem – I feel really satisfied."*

*Serving over 180 countries, Atlas Copco Group is a leading provider of industrial productivity solutions. Every day, across the United States and around the world, Atlas Copco Group products are working to produce just about everything we need and consume. Solutions include compressors, vacuum pumps, industrial tooling, and portable power equipment.*

*The Group's unwavering commitment is to continue to provide technology which transforms the future.*

Atlas Copco Group is proud to support:
