

April 26, 2017

Atlas Copco First-quarter report 2017

(unaudited)

Strong order increase in all business areas

The figures presented in this report refer to continuing operations unless otherwise stated

- Orders received increased 32% to MSEK 31 710 (23 950), organic growth of 18%
 - Double-digit growth in all business areas
- Revenues increased to MSEK 28 027 (22 453), organic growth of 11%
- Operating profit increased 37% to MSEK 5 711 (4 170)
 - Adjusted operating profit, excluding items affecting comparability, was MSEK 5 878 (4 157)
- Profit before tax amounted to MSEK 5 496 (3 989)
- Profit for the period was MSEK 3 989 (2 897)
- Basic earnings per share were SEK 3.28 (2.38)
- Operating cash flow amounted to MSEK 3 510 (3 127), including discontinued operations
- Vacuum Technique - New business area operational as of January 1, 2017

MSEK	January - March		
	2017	2016

Atlas Copco Group

New business area structure

As of January 1, the Group has five business areas instead of four. The vacuum business has been separated from Compressor Technique and a new business area has been created, Vacuum Technique. For further information on the business area structure, see the 2016 annual report.

Note: Business area figures for Compressor Technique and Vacuum Technique prior to January 1, 2017, are restated figures.

Review of the first quarter

Market development

Atlas Copco's overall customer demand improved, both sequentially and compared to previous year, and order intake for equipment and service increased sequentially and year-on-year. Orders for equipment were particularly strong. Strong organic growth was achieved in all five business areas.

Order volumes for small and large compressors as well as for gas and process compressors increased, so did the compressor service business. The order intake for vacuum equipment increased significantly, mainly driven by orders to the semiconductor and flat panel display industry. Order volumes for mining equipment and service increased significantly, supported by orders from both the mining and civil engineering market. The industrial assembly tools and solutions business, including related services, continued to grow during the quarter. Also order volumes for construction equipment and service, including the specialty rental business, increased.

Geographically, and compared to the previous year, the order volumes increased in all regions, with the highest growth in Asia.

Revenues, profits and returns

Revenues increased 25 % to MSEK 28 027 (22 453). Acquisitions and currency translation both contributed with 7% each, while the organic growth reached 11%.

The operating profit was MSEK 5 711 (4 170), corresponding to a margin of 20.4% (18.6), and includes a negative effect of change in provision for share-related long-term incentive programs, reported in Common Group Functions, of MSEK -167 (+13).

Adjusted operating profit increased 41% to MSEK 5 878 (4 157), corresponding to a margin of 21.0% (18.5). The significant increased profit was primarily due to the strong organic growth but it was also supported by favorable exchange rates. The net currency effect was MSEK 570. Recent acquisitions had a dilutive effect on the margin.

Net financial items were MSEK -215 (-181). Interest net was MSEK -218 (-169) affected negatively by higher gross debt and the stronger EUR and USD vs SEK. Other financial items were MSEK 3 (-12).

Profit before tax amounted to MSEK 5 496 (3 989), corresponding to a margin of 19.6% (17.8). Income tax expense amounted to MSEK 1 507 (1 092), corresponding to an effective tax rate of 27.4% (27.4).

Profit for the period totaled MSEK 3 989 (2 897). Basic and diluted earnings per share were SEK 3.28 (2.38) and SEK 3.27 (2.37), respectively.

The return on capital employed during the last 12 months was 28% (28). Return on equity was 26% (24). The Group uses a weighted average cost of capital (WACC) of 8.0% as an investment and overall performance benchmark.

Operating cash flow and investments (including discontinued operations)

Operating cash surplus reached MSEK 7 161 (5 278). Cash flows from financial items were MSEK -823 (+9). The main explanations for the big difference are negative cash flows from currency hedges of loans of MSEK 360 (positive 177), where the offsetting cash flow occurs in the future, and higher interest paid.

Revenues and operating profit – bridge

MSEK	Q1 2017	Volume, price, mix and other		One-time items	Share based		
			Currency	Acquisitions	LTI programs	Q1 2016	
Atlas Copco Group							
Revenues	28 027	2 434	1 490	1 650	-	22 453	
Operating profit	5 711	966	570	185	-180	4 170	
%	20.4%	39.7%				18.6%	

Working capital increased by MSEK 525 (decrease of 113), primarily due to receivables from the high invoicing at the end of the quarter. Net investments in rental equipment were MSEK 145 (113). Net investments in property, plant and equipment were MSEK 348 (263).

In total, operating cash flow, adjusted for currency hedges of loans, reached MSEK 3 510 (3 127).

Net indebtedness

The Group's net indebtedness, adjusted for the fair value of interest rate swaps, amounted to MSEK 12 438 (12 655), of which MSEK 4 111 (2 404) was attributable to post-employment benefits. The Group has an average maturity of 5.4 years on interest-bearing liabilities. The net debt/EBITDA ratio was 0.5 (0.5) and the net debt/equity ratio was 22% (25).

Dividend

The Board of Directors has proposed to the Annual General Meeting 2017 that an ordinary dividend of SEK 6.80 (6.30) per share be paid for the 2016 fiscal year. Excluding shares currently held by the company, this corresponds to a total of MSEK 8 247 (7 665). The dividend is proposed to be paid in two equal installments, the first with record date April 28, 2017 and the second with record date October 30, 2017.

Acquisition and divestment of own shares

During the quarter, 1 686 777 A shares, net, were acquired for a net value of MSEK 520. These transactions are in accordance with mandates granted by the Annual General Meeting and relate to the Group's long-term incentive programs.

Employees

On March 31, 2017, the number of employees was 45 166 (42 028). The number of consultants/external workforce was 3 570 (2 809). For comparable units, the total workforce increased by 1 175 from March 31, 2016.

Compressor Technique

MSEK	January - March		
	2017	2016	
Orders received	10 125	8 520	19%
Revenues	9 361	8 156	15%
Operating profit	2 102	1 792	17%
– as a percentage of revenues	22.5	22.0	
Return on capital employed, %	67	67	

- **Robust organic growth - increased order intake in all regions**
- **Double-digit growth for small and medium sized industrial compressors**
- **Steady growth for service**

Sales bridge

MSEK	January - March

Price, %	+0	+0
Volume, %	+9	+6
Total, %	+19	+15
2017	10 125	9 361

Industrial compressors

The order volumes for industrial compressors increased compared to the previous year and sequentially. Year-on-year the development was strongest for small and medium sized compressors.

The order intake increased in all regions, with the highest growth in North America and the Middle East.

Compressor service

The service business continued to achieve steady growth in all major countries.

Gas and process compressors

The order intake increased compared to the previous year, mainly driven by some important orders in North America and the Middle East.

Acquisitions

Two small acquisitions of distributors were made in the quarter: Hb Kompressoren Druckluft- und Industrietechnik GmbH, in Germany, with 10 employees and Orcan Basincli Hava Makinalari San. ve Tic. Ltd., in the European part of Turkey, with 17 employees.

Innovation

A new generation of oil-injected screw compressors for small industries was introduced in the quarter. The new generation compressors offers increased performance compared to previous models.

Revenues and profitability

Revenues increased to MSEK 9 361 (8 156), corresponding to an organic increase of 6%.

The operating profit increased 17% to MSEK 2 102 (1 792). The operating margin was 22.5% (22.0) and was supported by the higher invoicing and currency, but diluted by acquisitions. Return on capital employed (last 12 months) was 67% (67%).

Orders, revenues and operating profit margin

Vacuum Technique

Price, %	+0	+0
Volume, %	+33	+28
Total, %	+85	+88
2017	6 067	4 768

Semiconductor and flat panel display

The demand for semiconductor equipment remained very strong, driven by customer's introduction of new technologies and by capacity expansions. A number of significant orders for equipment to flat panel display and solar applications boosted the order intake further, compared to the previous year and sequentially.

Asia was the main driver for the strong development, but also Europe and North America achieved solid growth.

Industrial and high vacuum

Equipment orders for rough, industrial and high vacuum applications increased organically. The recently acquired Leybold business also had a good development.

Compared to the previous year the order intake increased in all major regions.

Service

The service business grew in all regions, compared to the previous year and sequentially.

Innovation

A new range of vacuum pumps for the laboratory and research facility sector was launched during the quarter.

The new pump range provides an ergonomic working environment through reduced noise level compared to comparable products. Also, a new motor design reduces the energy consumption and lowers vibration.

Revenues and profitability

Revenues increased to MSEK 4 768 (2 536), corresponding to an organic increase of 28%.

The operating profit surged 134% to MSEK 1 181 (504) and the operating margin reached 24.8 % (19.9). The margin was supported by volume and currency, but diluted by acquisitions. Return on capital employed (last 12 months) was 21% (13).

Orders, revenues and operating profit margin

Industrial Technique

MSEK	January - March		
	2017	2016

Price, %	+0	+0
Volume, %	+16	+12
Total, %	+23	+18
2017	4 303	4 031

Motor vehicle industry

The demand for advanced industrial tools and assembly solutions from the motor vehicle industry remained strong and the orders received increased significantly compared to the previous year.

Geographically, and compared to the previous year, the highest growth was achieved in North America and Asia.

General industry

The order volumes for industrial power tools from general industry increased compared to the previous year and sequentially. Orders for application segments such as aerospace, off-road and general assembly were the main contributors to the year-on-year growth.

Geographically, and compared to the previous year, orders received increased in all main regions, but particularly in Europe and Asia.

Service

The service business, including maintenance and calibration services, achieved growth in all regions.

Innovation

A new mechatronic wrench and a controller for assembly applications were introduced in the quarter. The products offer error proofing, full traceability in real time, and provide increased productivity. The new products close the gap between manual tightening and smart electric tools.

Revenues and profitability

Revenues increased to MSEK 4 031 (3 417), corresponding to an organic increase of 12%.

Operating profit was MSEK 933 (737), corresponding to an operating margin of 23.1% (21.6). The higher revenue volume was the main reason for the increased margin. Return on capital employed (last 12 months) was 36% (31).

Orders, revenues and operating profit margin

Mining and Rock Excavation Technique

MSEK	January - March		
	2017	2016	
Orders received	7 907	5 729	38%
Revenues	6 882	5 736	20%
Operating profit	1 361	866	57%
<i>– as a percentage of revenues</i>	<i>19.8</i>	<i>15.1</i>	
Return on capital employed, %	36	32	

- **Strong growth for equipment to mining and civil engineering**
- **Double-digit growth for recurring businesses; service and consumables**
- **Operating profit supported by volume and currency**

Currency, %	+10	+9
Price, %	+0	+0
Volume, %	+28	+11
Total, %	+38	+20
2017	7 907	6 882

Mining equipment

The demand for mining equipment improved, primarily due to replacement investments, and the order intake increased significantly compared to previous year's low level. Order volumes also increased sequentially.

Geographically, and compared to the previous year, order volumes increased in all regions except Africa/Middle East.

Civil engineering equipment

Orders received for equipment for infrastructure projects increased compared to the previous year and sequentially.

All major regions contributed to the growth compared to the previous year.

Service and consumables

The demand for service and consumables was positively impacted by higher activity in both mining and civil engineering. Service and consumables increased significantly year-on-year, and slightly compared to previous quarter.

All regions posted growth except Africa/Middle East.

Structural changes

In March it was announced that Atlas Copco had entered into two joint ventures with Hongwuhuan Group to develop, manufacture and sell equipment for the Chinese mining and civil engineering market. The equipment involves surface drilling rigs and rock drilling tools. One of the joint ventures will focus on development and manufacturing, and the other joint venture will focus on sales.

Innovation

The surface drilling rig range was extended with a machine equipped with Power Eco function, enabling it to adapt to suit harder or softer rock conditions to save fuel consumption without compromising the rig's penetration power.

Revenues and profitability

Revenues increased to 6 882 (5 736), corresponding to an organic increase of 11%.

Operating profit increased 57% to MSEK 1 361 (866), compared to a relatively low Q1 in 2016. The margin, 19.8% (15.1) was supported by higher revenue volume and currency. Return on capital employed (last 12 months) was 36% (32).

Orders, revenues and operating profit margin

Construction Technique

MSEK	January - March		
	2017	2016	
Orders received	3 568	3 061	17%

<i>– as a percentage of revenues</i>	<i>16.4</i>	<i>15.0</i>	
Return on capital employed, %	18	17	

- **Solid growth, primarily due to stronger equipment demand**
- **Growth for portable energy and service**
- **Operating profit supported by volume and currency**

Sales bridge

MSEK	January - March	
	Orders received	Revenues
2016	3 061	2 718
Structural change, %	+1	+1
Currency, %	+6	+6
Price, %	+0	+0
Volume, %	+10	+10
Total, %	+17	+17
2017	3 568	3 177

Construction equipment

The demand for construction equipment improved, partly related to increased fleet investments by rental houses. Order intake for most types of equipment increased, both compared to the previous year and sequentially.

Geographically, and compared to the previous year, orders grew strongest in North America, but Europe, and Asia also increased. South America and Africa/Middle East decreased.

Specialty rental

The specialty rental business order intake increased compared to the previous year, but was largely unchanged sequentially.

Compared to the previous year, most of the growth came in Europe.

Service

Orders received for the service business increased compared to the previous year and sequentially.

Geographically, the best development was in Asia and Europe, while the other regions were largely unchanged.

Innovation

A new range of electric dewatering pumps was introduced in the quarter. To offer easier handling, the new pumps are both smaller and lighter than previous models and afford up to 20% less energy consumption.

Acquisition

In February, Atlas Copco acquired Erkat Spezialmaschinen und Service GmbH, a manufacturer of drum cutter attachments, for construction and demolition and for quarries. The business has 38 employees and had revenues in 2015 of about MSEK 110.

Revenues and profitability

Revenues reached MSEK 3 177 (2 718), corresponding to an organic increase of 10%.

Operating profit was MSEK 520 (408), corresponding to a margin of 16.4% (15.0). The margin was supported by the higher invoicing volume and currency. Return on capital employed (last 12 months) was 18% (17).

Orders, revenues and operating profit margin

Accounting principles

The consolidated accounts of the Atlas Copco Group are prepared in accordance with International Financial Reporting Standards (IFRS). The description of the accounting principles and definitions are found in the annual report 2016. The interim report is prepared in accordance with IAS 34 Interim Financial Reporting. Non-IFRS measures are also presented in the report since they are considered to be important supplemental measures of the company's performance. For further information on how these measures have been calculated, please visit: <http://www.atlascopcogroup.com/investor-relations>

Risks and factors of uncertainty*Market risks*

The demand for Atlas Copco's equipment and services is affected by changes in the customers' investment and production levels. A widespread financial crisis and economic downturn affects the Group negatively both in terms of revenues and profitability. However, the Group's sales are well diversified with customers in many industries and countries around the world, which limits the risk.

Financial risks

Atlas Copco is subject to currency risks, interest rate risks, tax risks, and other financial risks. In line with the overall goals with respect to growth, return on capital, and protecting creditors, Atlas Copco has adopted a policy to control the financial risks to which the Group is exposed. A financial risk management committee meets regularly to manage and follow up financial risks, in line with the policy.

Production risks

Many components are sourced from sub-suppliers. The availability is dependent on the sub-suppliers and if they have interruptions or lack capacity, this may adversely affect production. To minimize these risks, Atlas Copco has established a global network of sub-suppliers, which means that in most cases there are more than one sub-supplier that can supply a certain component.

Atlas Copco is also directly and indirectly exposed to raw material prices. Cost increases for raw materials and components often coincide with strong end-customer demand and can partly be offset by increased sales to mining customers and partly compensated for by increased market prices.

Acquisitions

Atlas Copco has the ambition to grow all its business areas, primarily through organic growth, complemented by selected acquisitions. The integration of acquired businesses is a difficult process and it is not certain that every integration will be successful. Therefore, costs related to acquisitions can be higher and/or synergies can take longer to materialize than anticipated.

For further information, see the annual report 2016.

Forward-looking statements

Some statements in this report are forward-looking, and the actual outcome could be materially different. In addition to the factors explicitly discussed, other factors could have a material effect on the actual outcome. Such factors include, but are not limited to, general business conditions, fluctuations in exchange rates and interest rates, political developments, the impact of competing products and their pricing, product development, commercialization and technological difficulties, interruptions in supply, and major customer credit losses.

Atlas Copco AB

Atlas Copco AB and its subsidiaries are sometimes referred to as the Atlas Copco Group, the Group or Atlas Copco. Atlas Copco AB is also sometimes referred to as Atlas Copco. Any mentioning of the Board of Directors or the Directors refers to the Board of Directors of Atlas Copco AB.

Fair value of derivatives and borrowings

The carrying value and fair value of the Group's outstanding derivatives and borrowings are shown in the tables below. The fair values of bonds are based on level 1 and the fair values of derivatives and other loans are based on level 2 in the fair value hierarchy. Compared to 2016, no transfers have been made between different levels in the fair value hierarchy for derivatives and borrowings and no significant changes have been made to valuation techniques, inputs or assumptions.

Discontinued operations

Road Construction Equipment division within the Construction Technique business area

On January 19, 2017 Atlas Copco announced the agreement to sell its Road Construction Equipment division to the French industrial and construction company Fayat Group. The divestment is expected to be completed during Q2 2017.

The Road Construction Equipment division has been reported as discontinued operations and assets held for sale in the Atlas Copco Group's financial statements, with a retrospective restatement of previous periods unless otherwise stated.

The following tables present the income statement, condensed balance sheet and cash flow for the Road Construction Equipment division.

Accounting principles

Atlas Copco AB is the ultimate Parent Company of the Atlas Copco Group. The financial statements of Atlas Copco AB have been prepared in accordance with the Swedish Annual Accounts Act and the accounting standard RFR 2, Accounting for Legal Entities. The same accounting principles and methods of computation are followed in the interim financial statements as compared with the most recent annual financial statements. See also accounting principles, page 9.

Parent company

Distribution of shares

Share capital equaled MSEK 786 (786) at the end of the period, distributed as follows:

Class of share	Shares
A shares	839 394 096
B shares	390 219 008
Total	1 229 613 104
- of which A shares held by Atlas Copco	-16 500 161
- of which B shares held by Atlas Copco	-332 659
Total shares outstanding, net of shares held by Atlas Copco	1 212 780 284

Performance-based personnel option plan

The Annual General Meeting 2016 approved a performance-based long-term incentive program. For Group Executive Management, the plan requires management's own investment in Atlas Copco shares. The intention is to cover Atlas Copco's obligation under the plan through the repurchase of the company's own shares.

The Board of Directors will propose to the Annual General Meeting 2017 a similar performance-based long-term incentive program as in previous years. For further information, see www.atlascopcogroup.com/agm.

Transactions in own shares

Atlas Copco has mandates to acquire and sell own shares as per below:

- Acquisition of not more than 7 250 000 series A shares, whereof a maximum of 7 000 000 may be transferred to personnel stock option holders under the performance-based stock option plan 2016.
- Acquisition of not more than 70 000 series A shares to hedge the obligation of the company to pay remuneration to Board members who have chosen to receive 50% of the remuneration in synthetic shares.

- The sale of not more than 30 000 series A shares to cover costs related to previously issued synthetic shares to Board members.
- The sale of a maximum 5 500 000 series A and B shares currently held by the company, for the purpose of covering costs of fulfilling obligations related to the option plans 2011, 2012 and 2013.
- The shares may only be acquired or sold on NASDAQ Stockholm at a price within the registered price interval at any given time.

During the first quarter 2017, 1 686 777 series A shares, net, were acquired. These transactions are in accordance with mandates granted. The company's holding of own shares at the end of the period appears in the table to the left.

Risks and factors of uncertainty

Financial risks

Atlas Copco is subject to currency risks, interest rate risks, tax risks, and other financial risks. In line with the overall goals with respect to growth, return on capital, and protecting creditors, Atlas Copco has adopted a policy to control the financial risks to which Atlas Copco AB and the Group is exposed. A financial risk management committee meets regularly to manage and follow up financial risks, in line with the policy.

For further information, see the 2016 annual report.

Related parties

There have been no significant changes in the relationships or transactions with related parties for the Group or Parent Company compared with the information given in the annual report 2016.

This is Atlas Copco

Atlas Copco is a world-leading provider of sustainable productivity solutions. The Group serves customers with innovative compressors, vacuum solutions and air treatment systems, construction and mining equipment, power tools and assembly systems. Atlas Copco develops products and service focused on productivity, energy efficiency, safety and ergonomics. The company was founded in 1873, is based in Stockholm, Sweden, and has a global reach spanning about 180 countries. In 2016, Atlas Copco had revenues of BSEK 101 (BEUR 11) and more than 42 000 employees.

Business areas

Atlas Copco has five business areas. The business areas are responsible for developing their respective operations by implementing and following up on strategies and objectives to achieve sustainable, profitable growth.

The **Compressor Technique** business area provides compressed air solutions; industrial compressors, gas and process compressors and expanders, air and gas treatment equipment and air management systems. The business area has a global service network and innovates for sustainable productivity in the manufacturing, oil and gas, and process industries. Principal product development and manufacturing units are located in Belgium, the United States, China, India, Germany and Italy.

The **Vacuum Technique** business area provides vacuum products, exhaust management systems, valves and related products mainly under the Edwards, Leybold and Atlas Copco brands. The main markets served are semiconductor and scientific as well as a wide range of industrial segments including chemical process industries, food packaging and paper handling. The business area has a global service network and innovates for sustainable productivity in order to further improve its customers' performance. Principal product development and manufacturing units are located in the United Kingdom, Czech Republic, Germany, South Korea, China and Japan.

The **Industrial Technique** business area provides industrial power tools and systems, industrial assembly solutions, quality assurance products, software and service through a global network. The business area innovates for sustainable productivity for customers in the automotive and general industries, maintenance and vehicle service. Principal product development and manufacturing units are located in Sweden, Germany, the United States, United Kingdom, France and Japan.

The **Mining and Rock Excavation Technique** business area provides equipment for drilling and rock excavation, a complete range of related consumables and service through a global network. The business area innovates for sustainable productivity in surface and underground mining, infrastructure, civil works, well drilling and geotechnical applications. Principal product development and manufacturing units are located in Sweden, the United States, Canada, China and India.

The **Construction Technique** business area provides construction and demolition tools, portable compressors, pumps and generators, and lighting towers. The business area offers specialty rental and provides service through a global network. Construction Technique innovates for sustainable productivity in infrastructure, civil works, oil and gas, energy and drilling. Principal product development and manufacturing units are located in Belgium, Spain, Sweden, the United States, China, and India.

Vision, mission and strategy

The Atlas Copco Group's vision is to become and remain First in Mind—First in Choice® of its customers and other principal stakeholders. The mission is to achieve sustainable, profitable growth. Sustainability plays an important role in Atlas Copco's vision and it is an integral aspect of the Group's mission. An integrated sustainability strategy, backed by ambitious goals, helps the company deliver greater value to all its stakeholders in a way that is economically, environmentally and socially responsible.
